

KE

RETRACTABLE AWNINGS

KE THE RIGHT CHOICE

SEVEN IMPORTANT REASONS TO CHOOSE KE

KE

KE's experience and strong organization makes us an industry leader in outdoor shading products. KE is part of the BAT GROUP, a multi-national company with sales in 76 countries. This guarantees excellent synergy between innovation, expertise, and choice of materials. KE is always investing in research, product development and employee education in order to improve our products and provide elegant solutions for our customers.

DESIGN AND CUSTOMIZATION

KE products are custom manufactured to meet your specific requirements.

INSTALLATION AND SERVICE

KE has a network of 500 affiliates across the US to provide expert guidance, installation and service.

ITALIAN DESIGN

KE products are designed in Italy by engineers and designers with decades of experience in the outdoor living space industry.

MANUFACTURING

Three US production facilities and a total of 9 worldwide ensure that KE can meet all of your requirements for high quality customized shading solutions.

INNOVATION

All KE shading systems are born from innovative, creative ideas that offer unique advantages in application and durability. KE proudly holds 36 patents for our designs.

QUALITY

KE has earned multiple worldwide certifications for quality, including CE EN 13561, EN 10901, ISO 9001, ISO 18001 and ISO 14001.

ENJOY THE OUTDOORS!

Create an eye-catching look for your deck or patio while adding living space for you to enjoy!

Your KE Retractable awning provides high grade UV protection, allowing everyone to enjoy the outdoors longer and more safely.

From full-featured automated awnings to affordable entry-level models, the KE family of retractable awnings has what you're looking for. Providing on-demand solar protection, retractable awnings expand your home beyond its walls. With the touch of a button or turn of the crank, these awnings transform your deck, patio or terrace into an attractive and comfortable expanded living space.

DESIGN & FUNCTIONALITY

Add Living Space to Your Deck or Patio by Creating the Perfect Outdoor Environment for Family and Friends to Enjoy

MAXIMUM MEASUREMENTS
Max measurement up to 46' wide and up to 23' projection

FABRIC ROLLING
KE designed and patented technology avoids folds and creases during the rolling process

OVERALL DIMENSIONS
Elegant design reduces overall dimensions to produce an attractive profile, whether extended or retracted

AUTOMATION
Available wind, rain and sun sensors allow for automation that helps to protect awnings against harmful weather

WIND RESISTANCE
KE products are tested and rated to withstand windy conditions

RETRACTABLE ARMS
Retractable arms are specifically designed for long service life

EASY INSTALLATION
KE awnings are easy to install with fastening systems designed for each kind of wall

FABRICS
More than 500 fabrics to choose from in a wide variety of styles and colors

LED LIGHTING
Available to increase beauty, functionality, and use

Maximize your outdoor living space, provide relief from the sun's harmful rays, reduce energy costs and create an elegant expression of your personal taste and style. Versatile and beautiful... KE awnings are custom-crafted and professionally installed to create a cool, natural extension to your home. Enjoy the Outdoors with KE.

Qubica. The luxurious retractable awning designed to be beautiful, always.

Qubica combines the very best of functionality and style. Hardware and fasteners are hidden from view to create an elegant appearance. The new KE Aki arm with integrated, recessed LED lighting creates a warm, inviting space to entertain well into the evening hours, or to brighten up a cloudy day. Elegant and sophisticated even when closed, the Qubica awning offers greater outdoor luxury.

BELLA PLUS

STANDARD FRAME COLORS

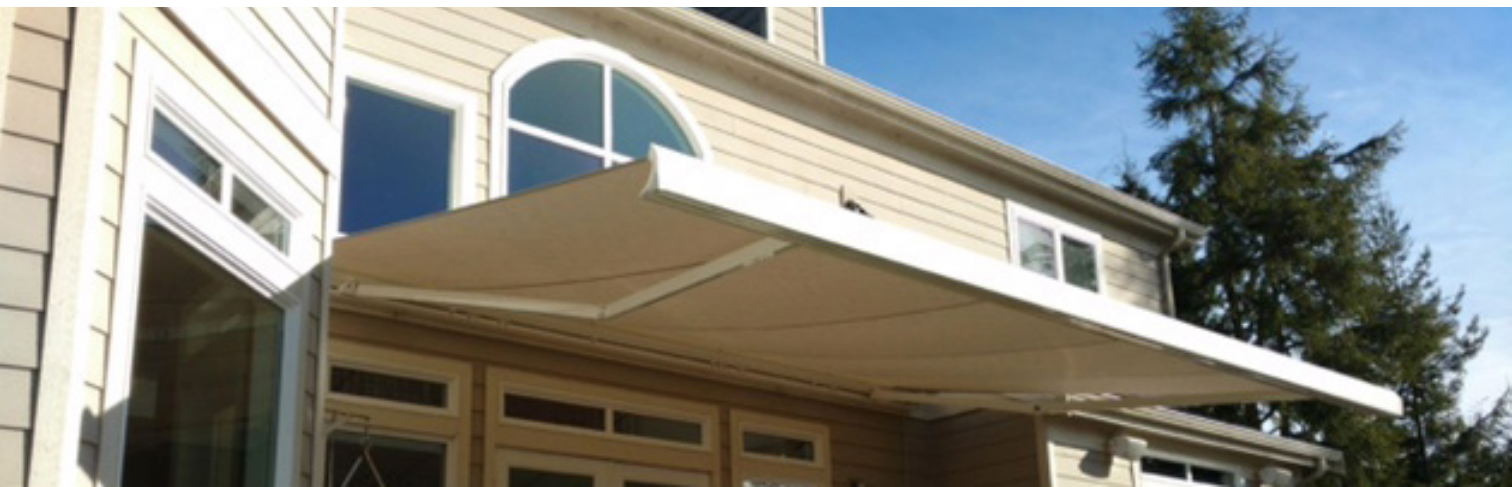

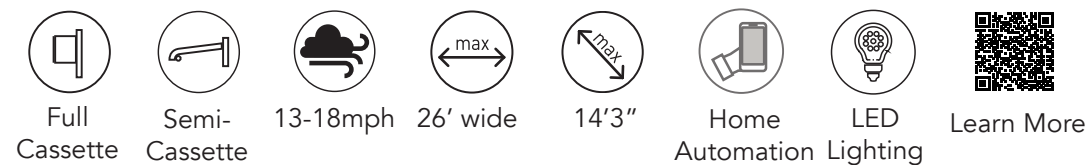

Available with either full or semi-cassette design, Bella Plus completely encapsulates the fabric to protect it from the elements when the awning is closed.

The profiles for the front rail, bottom cover, and optional backside offer a variety of choices. Bella Plus has an integrated direct mounting bracket incorporated into its design. With arm projection options up to 14'3", Bella Plus provides a luxurious amount of shaded space.

An optional manual drop valance is available on the full and semi-cassette units. LED lights are available on all projections.

CASSETTE OPTIONS

DOMINA

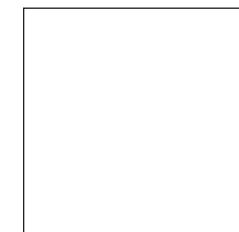

Domina is a modern, lightweight full cassette retractable awning that mounts easily on a wall or soffit. It's design combines classical design with advanced technology.

Easy to install, easy to adjust the pitch, Domina is a sleek, beautiful and functional addition to any outdoor living space.

Domina is available in motorized or manual configurations. LED lights are available on all projections.

- Cross-arm technology allows for minimum 3' 8" width.
- Available in motorized or manual configurations.
- Optional drop valance available up to 24' width and projection up to 11' 9".
- More than 500 fabrics to choose from and LED lights are available on all projections.

REGAL

The KE Regal retractable awning offers style, functionality and value as our most competitively priced custom shading system. An excellent choice to add beauty, dimension and detail to any part of your home, Regal's classic design is available in two standard frame colors - white and sand.

With a custom width up to 23' wide and a maximum projection of 11'2", Regal provides the shade you need wherever it's needed - a doorway, patio, balcony or picture window. With Regal, there is no need to sacrifice our most popular features.

STANDARD FRAME COLORS

WHITE

SAND

Even when retracted, Regal adds a touch of sophistication and a valuable function to any home.

Available in motorized or manual configuration, Regal is constructed of strong, lightweight aluminum for durability.

Reduce sun glare to provide a more pleasant indoor environment.

Minimize solar heat build-up which can reduce cooling costs

Regal can be mounted on a wall, roof or soffit and comes with an 8-year frame warranty.

More than 500 fabric to choose from.

SPACE

Space is an elegant and modern tension roll-up shade system that mounts onto an existing substructure such as a veranda or pergola.

Easy to install and equipped with a full cassette, Space is characterized by adjustable width guide rails that can be moved inward by as much as 1'8". The fabric roll-up system is tensioned by gas piston struts and cables for optimal performance on a custom size maximum projection up to 23' and a maximum width of 23'.

SPACE WALL

Space Wall is an elegant and modern tension roll-up shade system designed to mount to a wall, soffit, or roof with supporting leg posts.

Easy to install and equipped with a full cassette, Space is characterized by adjustable width guide rails that can be moved inward by as much as 1'8". The fabric roll-up system is tensioned by gas piston struts and cables for optimal performance on a custom size maximum projection up to 18' and a maximum width of 23'.

The Pinnacle One tension roll-up shade system with full cassette creates a pergola post setup with direct attachment of the cassette to the building structure.

With spring/cord fabric tensioning, the maximum width and projection is 16' x 16' in a single module. Additional modules can expand the configuration to a maximum overall width of 48' width with dual track guide rails between modules attached to a single shared post column.

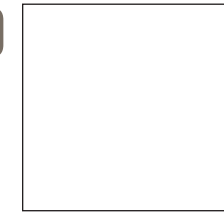

Drop screen options can be added to the front side of the unit to provide protection from low sun angle exposure.

PINNACLE TWO

Automation

Learn More

Pinnacle Two can be mounted on an existing pergola or other suitable structure. Constructed with the same engineering features as Pinnacle One, but without the front leg posts, Pinnacle Two mounts easily to the sub-structure with available variable height and side-to-side mounting brackets.

With spring/cord fabric tensioning, the maximum width and projection is 16' x 16' per single module. Additional modules can expand the configuration to a maximum overall width of 48' with dual track guide rails between modules.

Optional wall brackets are available for backside cassette mounting when top mounting is not feasible. In this configuration, the front side of the guide rail needs to be attached to the structure with a top mounting bracket.

TOPAZ

This retractable drop-arm window awning in a cassette is perfect for windows up to 16’ wide. The spring-loaded arm tension guarantees a taut fabric cover that can be dropped to a 160 degree position, just short of totally vertical, while still allowing some light to enter. The sleek design of the front rail fits flush against the cassette housing that contains the fabric roller for a more attractive and compact appearance when the unit is retracted.

INTEGRATED LED LIGHTING FOR RETRACTABLE AWNINGS

Standard Arm with Integrated LED

New Somfy LED 24v DC Controller

Pre-assembled LED Arms

These retractable awning arms include factory-installed, integrated LEDs that provide a sleek, clean appearance and help speed assembly of the unit. The soft LED light provides an enjoyable ambiance to enhance outdoor living with switch-controlled, non-dimmable LEDs. Pre-assembled LED Arms are available on Qubica, Bella Plus, Domina and Elite Plus awnings, in all sizes.

Somfy's new LED Controller adds dimmable functionality to pre-assembled LED arms and can control up to 2 pairs of retractable arms per controller.

Pre-assembled LED Strips

Factory-installed integrated LEDs make these optional light strips quick and easy to install to add practical beauty to any KE shading system.

AUTOMATION FOR YOUR RETRACTABLE AWNING SYSTEM

Adding weather sensors to your retractable awning helps to protect your investment and provides peace of mind when you're away from your awning.

Wind sensor systems can automatically retract your awning when high winds are detected, preventing damage to the awning.

Enjoy the outdoors while protecting yourself from the sun by equipping your awning with a sun sensor so that it opens automatically.

A Somfy wire-free motion sensor can automatically close the awning to help protect your awning from damage caused by high winds.

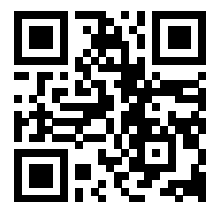

The Ondeis® WireFree RTS Rain and Sun Sensor is a solar-powered combined rain and sun sensor. Completely wireless, it uses optical rain-sensing technology to measure rainfall and sends an wireless command to close the awning when rainfall exceeds the user-selected threshold. The sun-level sensor sends a command when sunlight exceeds the user-selected threshold.

SOMFY Mylink WIFI

Transform your experience with Somfy motorized solutions that maximize benefits such as energy savings, privacy, comfort and convenience.

Somfy myLink puts you in control, so you can operate your motorized shades, blinds, awnings and screens with your favorite mobile device, whether you're home or not.
