STANDING SEAM AWNING

Coastal Canvas Products Standing Seam metal awnings add a distinctive finishing look to any retail or commercial building. Our standing seam metal roof awnings have a durable finish which will allow for many years of low maintenance performance. We utilize welded structural aluminum in all our awning frames. Each frame is covered with standing seam metal panels that come in a variety of widths, gauges, and powder coated finishes.

FEATURES

- Engineered to exact specifications of the building
- Structural welded all aluminum frame
- Custom metal standing seam roof pans
- Variety of powder coat finishes available

12" STANDING SEAM PANEL

BENEFITS

- Enhance appearance of your building or home with a durable standing seam awning that will block out glare and heat from the sun
- Savings on your energy bills and possible sun damage to your interior surfaces
- Create an architectural statement for your home or business.
